

CARE AND CLEANING

To extend the longevity of the clear flexible map sleeve, we recommend that when not in active field use, it be stored with this foam insert (or a map) in place, and in a single fold position as it was originally packaged. Prolonged storage in a empty double-folded state causes the material to set up into hard creases that can be difficult to release; especially in colder temps. To clean, use a mild detergent and a clean rag to gently wipe the surface.
